

What you need to know about...

Licensing/Certification

Green Industries Certification

If a lawn care professional maintains your lawn, ask to see his or her **"Green Industries Best Management Practices Certification"** card. The certification is required of all lawn care professionals who apply fertilizer or install landscape plants in Marion County.

The certification is administered by the Florida Department of Environmental Protection and courses are offered many times a year at the UF/IFAS Marion County Extension Service.

If you are a lawn and landscape professional interested in becoming certified or know someone who would be interested in green industries certification, contact:

UF/IFAS Marion County Extension Service
352-671-8400

*The Marion County Fertilizer Education Program is brought to you by the Marion County Board of County Commissioners and the UF/IFAS Marion County Extension Service.
For more information, call 352-671-8686.*
